(54) PRINT ORDERING SYSTEM AND CONTROL METHOD THEREFOR, SERVER COMPUTER AND COMMUNICATION TERMINAL USED ON PRINT ORDERING SYSTEM, AND CONTROL METHOD THEREFOR

(57)Abstract:

PROBLEM TO BE SOLVED: To easily order a print by an additional print.

SOLUTION: When accepting input of image data, an image access/ordering ID and a password, and an order fixing ID and a password are issued (formed).

Respective group members transmit the image access/ordering ID and the password to a server 6 by using a cellphone 20A. The image data related to the image access/ordering ID is transmitted to the cellphone 20A from the server 6. The group members select an image for ordering the additional print while looking at an image displayed on a display image screen of the cellphone 20A, and transmit the order number of additional prints. When transmitting the order fixing ID and the password to the server 6 by using the cellphone 20A, an order of the group members is fixed. Desired images of the respective members are additionally printed by the desired number.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
